There are 14 types of traps: 1. Saw a Simple Round Saw. Just jump over it and you're good to go! 2. Cannon constantly fires fireballs in the direction in which he stands. 3. Self-guided gun tracks your position, can shoot in several directions. 4. Red Guard is a monster that moves vertically or horizontally. The longer the distance of his path, the slower it moves. 5. The Blue Guard moves in a circle. The larger the radius, the faster it moves. 6. The bird follows you anywhere, so don't stop! 7. The platform is not a trap, but a feature of some dungeons. Helps to get to certain parts of the dungeon. You can choose where to place it. 8. The trampoline allows you to perform high jumps. Works just like a platform. 9. Gravitational switch inverts gravity and allows you to reach previously inaccessible places while walking on the ceiling. 10. Ricochet Mighty Fist, which flies through the dungeon and bounces off its walls. 11. Lil' Scorcher is an adorable little dragon that spews flames in the direction it encounters. Can't burn when it's inside a wall. 12. Roosters He is still and do not shoot, but if you want to stay alive, then jump as often as possible. READ: King of Thieves: How to protect my dungeon? 13. The Guardian He shoots in four directions like a regular gun. The guard can move horizontally and vertically like the Red Guard. Be aware of his horn! 14. Bloodhound Bloodhound can be placed on surfaces or walls. When the player touches the surface where the trap is located, Bloodhound begins to follow the thief. It stops at the end of the surface and does not cross the gaps. How does the trap update work? Upgraded traps work just like non-modernized ones (meaning they don't get faster or sharper), but do much more damage. So they are more effective in protecting your gem. The less health an attacker has, the less chance he has to steal from you. Please note that when the trap is updated, it does not function and the chest is more vulnerable. To update the trap, just click on it. Trap upgrades require gold. You can determine the level of the trap by her view: Can I update more than one trap at a time? No, you can only update one trap at a time. However, if you have a couple of traps (i.e. two saws), if you decide to upgrade one, both will be updated. Please note this will make your breasts very vulnerable. Are renewal traps permanent? Yes, all updates are permanent, including updates to traps. If you upgrade the saw to level 5, whenever you get a base that can be equipped with it, your saw will be level 5 rather than 1. How do I turn off the traps? There are two ways to disable traps: 1. Disable the trap potion Buy this potion for balls to disable one random trap. 2. Die more than seven times if The character dies more than seven times, the game automatically disables the trap that caused the most damage. The disabled trap becomes slightly visible. READ: King of Thieves: What are the ingredients and how to get them? How many traps can I set? Everyone has three traps, plus a platform, trampoline or gravitational switch in some dungeons. Can I choose which traps to set? When you move into a new dungeon, you need to choose from three sets of traps that you can buy for gold, balls or emeralds. With the first two sets, you'll also get pre-placement traps. Random Trap Set gives you 3 random traps and you can change any of them by spending balls if you don't like the ones you got. Note that you can't have 3 of the same traps in a random set, and you have to create your own placement traps for the Random Trap set. When you get them, you have to build your own protection because there is no standard (automatic) placement in this set. You can change the set of traps in Editing mode. Can I choose a dungeon layout? No, the dungeons are randomly generated. The dungeon layout will only be changed when it moves to the next dungeon. Can I buy a platform, trampoline or gravitational switch? No, these traps are only available in some dungeons. If I buy a set of traps, will they apply to the next dungeon? No, the traps only apply to the current dungeon. Sets of available traps can be repeated from time to time, but each time you need to buy them from scratch. Will the skull ever disappear from my dungeon? No, the skulls are permanent if you don't collect them or come out of the dungeon. Why do I have to complete my dungeon twice in a row? You have to complete your own dungeon to prove that it is possible. Doing it twice in a row means that it's not only possible, but the chances of doing so are high enough for most players with the same skills as you. READ: King of Thieves: What are lockpicks for and how to get them? What is dungeon solutions and how to watch them? Can't sneak through a dungeon and think it's invincible? We rate all the dungeons to be 100% beat and now you can check it out yourself. If you decide to drop the attack without reaching your chest, you can now see how to pass this dungeon. But remember that you won't be able to try the dungeon again after you've watched the solution. Preview mode you can try on each outfit before buying in preview mode. Long click on any costume you want and try it out in your own dungeon! Skip the dungeon When your totem breaks, you need to move on to the next dungeon. From now on you can change it if you don't like your next layout. To do this, click Skip, and then there's another random dungeon. You have to pay the balls to skip the dungeon. This feature is only available to those players who have already completed all the missions of one player on the map and broke 20 totems.
